

Heavy Duty Handling Trackless Transfer Trailer

Trackless transfer trailer runs on cement floor or steel plate ground. It has a load ability from **1t to 300t**. It is a kind of transfer trailer with **simple structure, easy operation, cost-effectiveness price, large start torque and steady start**.

The trackless transfer trailer can turn around freely **360 degrees**. Its wheels are specially designed so that the trackless transfer cart does **no damage to the ground**.

Other features:

Heat resistance
Anti-explosion
No limit of running distance
Anti-dust painting
Designed length and width
Narrow or wide rail gauge

Application

The trackless transfer trailer is usually applied in **metallurgy plant, coal and mine industry, electronics** and Other heavy industries to transfer heavy cargoes of **weldments, machine processing pieces, metal forging and casting, melt steels**, etc.

Also, a **v-bed** can be added on the platform to transfer cargoes of special shapes such as **steel coils, coiled sheets, galvanized coils, mills, steel tubes and pipes** and other heavy cargoes of special shapes in **metallurgy plant and shipbuilding industry**.

Technical Parameters

Rated load(t)	5	15	30	50	
Structure of frame	Steel plates welded, beam structure				
Thickness of the steel plate(mm)	8	12	14	16	
Wheel load(t)	2.8	4.3	7.7	12	
Structure of frame	Steel plates welded, beam structure				
Thickness of the steel plate(mm)	8	12	14	16	
Wheel load(t)	2.8	4.3	7.7	12	
Ground requirement	Cement ground		Steel plate ground		
Table size(mm)	3000*2000	4000*2200	5000*2200	6000*2300	
Motor power (kw)	3.5	6	10	15	
Wheel diameter(mm)/quantity	300/4	350/4	400/4	400/6	500/6
Wheel quality	Zg55+ hydropur ture				
Function of charger motor	Automatic charging				
Radar control	3-0.3, automatic stop for obstacles				

If you have some special requirements in table size(**length and width**),motor power, control method(**remote control, hand held pendant control**), our engineers could design for you!
